Full - Stack Tech Consultant | '14 University of Waterloo Mechatronics Engineering

TECHNICAL SKILLS

Solid knowledge of object oriented & functional programming paradigms

Extensive experience with JS (ES2015) & JS libraries / frameworks – React, Node, Express

Experience with Python, Java, C++, C, Swift

Solid grasp of architecture, infrastructure, devops pipeline (Docker, *nix), RESTful API design

WORK EXPERIENCE

Deloitte, Consultant, '16 – present

Leading Canadian Retailer Loyalty Program Revamp (current)
- Solution engineer – JS (ES6, React, Redux, Express), RESTful API design

Sales demo app
- Architected solution and led team of developers, designers building full stack application to demonstrate Deloitte's frontend, backend & devops capabilities in response to RFP

Deloitte, Business Technology Analyst, Jan '15 – '16

Sonnet Insurance Digital Transformation
- Solution Architect

Banking Proof of Concept App
- Designed and built a full stack web application using MongoDB, Express, Angular, Node.js for demo / sales

Rubix by Deloitte team
- Managed two developers, defined & executed on overall strategy & roadmap

Top 5 Canadian Bank
- Performed day to day program management; coordinated program cost and work effort estimation

Toyota Motor Manufacturing Canada (TMMC), Software Developer Co-op, Jan – Apr '12
- Designed & implemented tablet-based solution using J2EE to optimize annual inventory process; increased efficiency by ~50%, leading to cost savings of ~$200k+ annually

RELEVANT PROJECTS

Live TTC Map – *Personal Project*
- Designed & built system to show real-time locations of Toronto transit vehicles
  Technologies: jQuery, Node, GMaps API

Government of Ontario Data crawler – *Deloitte Hackathon*
- Built script to crawl publicly available data from various Government of Ontario organizations & compile comprehensive org chart including names, titles, salaries etc
  Technologies: Python, BeautifulSoup

Apple Watch Stocks app - *Personal project*
- Designed & built a simple portfolio management app for Apple Watch
  Technologies: Swift, Node.js, Yahoo Finance API

3D Laser Scanner - *4th Yr. Engineering project*
- Designed and built low cost laser sensor capable of modeling its environment and objects around it in 3 dimensions. Point cloud data is streamed to computer in real time wirelessly over UDP
  Technologies used: Raspberry Pi, Arduino, C++, Matlab, Meshlab, image processing, UDP, ZigBee, Motors, Optical encoder

Facebook Like-meter T-shirt - *2014 Facebook Hackathon*
- Designed & built 'Like-meter' LED T-shit in 24 hr hackathon
- Like-meter fills up as you get likes on Facebook
  Technologies: Raspberry Pi, Python, FB API

Real-time Operating System (RTOS) – *MTE 241 Project*
- Designed & built Real Time Operating System (RTOS) on top of UNIX; Implemented concurrency, timing services, process scheduling, inter-process communication & other features
  *Technologies used: C/C++, Algorithms & Data Structures, *nix*
